Environment In The 90's

Speaker's Agenda

William F. Zachmann, Vice President/Corporate Research, International Data Corporation. The coming "second generation" of systems.

Dr. John Seely Brown, Vice President of Advanced Research, XEROX PARC. What emerging technology will offer the knowledgeworker at his workstation.

Dr. Craig Fields, Senior Scientist, DARPA, DoD. The DoD perspective on coming technology and its application within the defense environment.

Dr. Gerald Paul, Vice President of Systems and R&D, Wang Corporation. What the integrated office environment will provide—the strategic directions and investments of office systems vendors.

Edward Matthews, Consultant, former IBM R&D Manager. What managers need to know as they plan for the future of their organizations.
